Skills

- JavaScript | Tailwind CSS | React | Redux | Context Api | CSS | Bootstrap | SASS | Figma | TypeScript | Next | Canva
- Python | Django | Flask | Fast Api | Api Integration | Swagger | S3 | AWS | Requests | Selenium | BS4 | SQL | Postgresql
- Git | Github | Github Actions | CI /CD | English Urdu, Punjabi- All professional proficiency or above

Experience

Associate Software Engineer

[iTitans - KHUB](#)

Lahore, PK

9/2023 - Current

- Worked as a backend Engineer for a Warehouse Management Software [K-Hub](#)
- Followed the agile framework of Scrum and coordinated with Project managers, Frontend and QA to make reliable and efficient solutions.
- Designed and developed efficient sql query for data fetching and using SQLAlchemy alongside for database operations
- Constructed RESTful API's to handle client requests and return appropriate responses
- Handling async operations with celery and scheduling tasks at their desired time.
- Developed production-ready web pages from **Figma** designs, ensuring seamless integration between design and development.
- Adhered to SEO, and coding best practices throughout the web development process.
- Worked on Payment Integration using NMI and Grailpay.

Projects I've worked on: [K-Hub](#), [iTitans](#), [BWB](#), [FRP](#)

Software Engineer, Trainee

[iTitans](#)

Lahore, Pk

01/2023- 8/2023

- Learned Fundamentals of Web development and got familiar with technologies like HTML, CSS and Javascript.
- Moved to React and Django for creating full stack applications.
- Developed multiple React Projects that included **API Integration, Redux, Context API, react router, interceptors, Formik, Hooks**.
- Build Robust RestFul API's using Django Rest Framework that included **ORM, Table Relationships Swagger, filtering, Querying, JWT authentication, password recovery, serializers, routing**.
- Collaborated with fellow trainees using GitHub on multiple projects.
- Brushed up our presentation and soft skills with constantly presenting our projects to a wide audience.

Data Analyst

[Freelance](#)

Remote

5/2022 - 12/2022

- Developed interactive data visualization web applications using Streamlit, enabling dynamic data exploration and presentation.
- Utilized Plotly and Seaborn libraries to create comprehensive and visually appealing charts and graphs, effectively conveying insights from complex datasets.
- Established connections to various databases, extracting and transforming data for analysis and visualization within web applications.
- Completely automated the marketing platforms' user-experience testing process by integrating Nightwatch Selenium.

Web Scraper

Remote

5/2021 - 04/2022

- Used Python to scrape important data from multiple websites, static or dynamic. The data helps companies or individuals make better informed decisions.
- Utilized Selenium for dynamic web scraping, handling complex web navigation and extracting data from interactive web pages.
- Transformed raw web data into structured and organized datasets using Python's Pandas library, streamlining data preparation and analysis.
- Saving the scraped data in desired format like google sheets, CSV, JSON or excel.

Projects

- [React BMS Dashboard](#) : A dashboard to manage blogs uses Context Api for state management, local storage and Axios for api integration.
- [Django BMS Restful Api](#): A blog management system made with DRF that uses JWT for auth, serializers, ORM and swagger.
- [CryptoCurrency Tracker](#) : A Python bot that tracks crypto currencies and updates the google sheets when there's a change in prices.

Education

Bachelors of Science

[University of Education](#)

Lahore, Pk

08/2019 - 10/2023

- Major in Information Technology

Hobbies

- Chess ♟ | Reading | Football | NBA | Basketball
